PHY: Write the differences between distance and displacement.

Chem: The mass per unit volume of a substance is called density. (density = mass / volume).

Arrange the following in order of increasing density - air, exhaust from chimneys, honey, water, chalk, cotton and iron.

PHY: DISTANCE (1)

Displacement	Distance
It is vector .	It is Scalar.
it can be zero.	it can never be 0 for a motion.
it can be negative.	it can never be negative.
It is the shortest distance between any two points of a journey.	It is the actual path covered by the object in motion.
It can be lesser than the distance	Distance is either equal to or greater than displacement.

Chem. The given substance in the increasing order of their densities can be represented as: Air < Exhaust from chimneys < Cotton < Water < Honey < Chalk < Iron.

**Social
Studies**

**Pol Sc._Differentiate between Democratic and Non
Democratic Govt.**

**Geography- What is the importance of location of
India?**

**Economics- Differentiate fixed capital and working
capital.**

**Ans_The govt run by people after choosing
the representatives ,is called democratic
govt while a govt run by an individual by
his own will.**

**Ans- India's central location at the head of
Indian ocean gives it a great strategic
importance and helps in maintaining. It
helps India to keep a close contact with west
Asia,Africa and Europe from western
cost,and southeast and east Asia from the
eastern Asia.**

**Ans- 1. Fixed capital refers to the
investment of the enterprise in long term
assets of the company while Working
capital means the capital invested in the
